

ALDAYAN A. AVILA DOTEL

Full Stack Developer | PHP • JavaScript • Node.js | AI Automation & LLM Integration

aldayan.avila@gmail.com | 849-517-5691 | aldayan.github.io/portafolio | github.com/aldayan

PROFESSIONAL PROFILE

Full Stack Developer with 6+ years of experience designing, developing, and deploying scalable web applications and REST APIs. Proficient in PHP, JavaScript, Node.js, and relational databases. Growing specialization in applied artificial intelligence: business process automation using LLMs, AI agent integration, MCP (Model Context Protocol), and N8N workflows. Passionate about solving complex problems, optimizing processes, and building solutions that create real business impact.

WORK EXPERIENCE

Full Stack Developer | [Syntonex](#) | Sept 2022 – Present

- Design and implementation of scalable web solutions using PHP and MySQL, optimizing system efficiency and performance.
- Design, development, and maintenance of robust REST APIs for integration across multiple services and external platforms.
- Built chatbots and AI assistants using LLM and MCP, automating key business processes and reducing manual workloads by 40%.
- Automated operational workflows with N8N and AI agents, streamlining repetitive tasks across multiple departments.
- Led software analysis and design, ensuring alignment with business requirements and long-term scalability.
- Implemented web application security best practices and conducted code reviews for maintainable, production-ready solutions.
- Managed Dev-to-Production migrations and containerized environments using Docker.

Systems Analyst & Automation Developer | [Fernandez de Castro Corredores de Seguros](#) | Jan 2026 – Present

- Administer and maintain relational databases (MySQL/MariaDB) for clients, contracts, and insurance claims.
- Automate operational processes using PHP and PowerShell scripts, eliminating repetitive manual tasks.
- Generate KPI reports and executive dashboards from internal management system data.
- Support digitization and modernization of internal brokerage platforms and workflows.

Full Stack Developer & Systems Support | [Ferlon Industries](#) | Jan 2026 – Present

- Support administration of internal systems and automate operational tasks through scripting.
- Configure and maintain network environments and workstations to ensure operational continuity.
- Document technical processes and provide guidance to users on internal system usage.

Front-End Developer | [Ailogic](#) | Sept 2020 – Jan 2021

- Designed and developed web applications and enterprise systems using JavaScript and Angular.
- Conducted code reviews and optimized front-end architecture within Agile/SCRUM teams.
- Implemented unit testing and software quality assurance practices.

TECHNICAL SKILLS

Programming Languages

PHP, JavaScript, Python, Java, SQL

Frameworks & Libraries

Node.js, Angular, Laravel, Express.js

Databases

MySQL, MariaDB — schema design, query optimization, migrations

APIs & Integrations

REST APIs, third-party service integration, webhooks, authentication (JWT, OAuth)

AI & Automation

LLM (Large Language Models), MCP (Model Context Protocol), AI Agents, N8N, Chatbots

DevOps & Tools

Git, GitHub, Docker, Jira, VS Code, Figma

Other

Web Application Security, SCRUM / Agile, Dev-to-Production Migration, PowerShell

FEATURED PROJECTS

Inmobiliaria Capital | inmobiliariacapital.free.nf |

- Full-featured real estate web platform with admin panel, property listings, and search functionality.

Pasantes ALPHA | pasantesalpha.free.nf |

- Internship management system with registration, tracking, and reporting modules for companies and students.

BikerRacer | aldayan.github.io/BikerRacer |

- Interactive browser game built with vanilla JavaScript; real-time collision logic, animations, and scoring system.

AI Chatbot + Voting System + Dashboard | github.com/aldayan |

- Enterprise chatbot integrated with LLM for automated customer interactions. Secure voting system and real-time data visualization dashboard.

EDUCATION

Software Development Engineering (5th Term) | [UNAPEC](#) | 2024 – Present

Intensive Technical Degree in Software Development | [Oracle – Alura](#) | 2021 – 2022

Associate Degree in Software Development | [ITLA](#) | 2019 – 2021

ADDITIONAL TRAINING & CERTIFICATIONS

- Full Stack Developer – Oracle / Alura (2021–2022)
- Artificial Intelligence & LLM Bootcamp – Self-taught (2023–2024)
- Automation with N8N and AI Agents – Self-taught (2024)
- MCP (Model Context Protocol) Integration – Self-taught (2024)
- Self-taught: Python, Node.js, Docker, Figma, advanced databases, web application security

LANGUAGES

Spanish – Native | English – Technical Level – Intermediate (oral and written)
